

Field Techniques Workshop – Iguanas and Conservation

A 10-day, hands-on experience on Roatan, Islas de la Bahias, Honduras

Workshop: 4-13 April 2019

Applications Due: 11 January 2019

Gain experience in field techniques for working with herpetofauna, while contributing to a long-term iguana population monitoring program. Accommodation, food, and partial international transportation are covered. Spaces are very limited. Priority will be given to those working in iguana conservation and management and living in iguana range countries in Central America, Mexico, and the Caribbean.

Dr. Pasachnik has 20 years of experience working in iguana conservation and management, with research projects focusing on ecology, genetics and education. Dr. French is a physiological ecologist with over 18 years of experience working with conservation and physiology of reptiles in the wild. Daisy Maryon is currently pursuing her doctorate studying the ecology of the Utila Spiny-tailed Iguana in Honduras.
